made in Germany

Icetek® Flexible shower door

In business for more than 30 years the company group has evolved into a world wide supplier of glass-metal systems. Since the 1960's Karl Loggen dealt with the invention and development of innovative hinges, which is the main business of the company today. During the same time Megla-Technik next to the metal-glass systems developed surface technologies for glass.

In the second generation of the two companies KL-Beschlaege Karl Loggen GmbH and Megla Technik GmbH, under the leadership of Joerg Loggen and Peter Reinecke, the sales departments were merged into KL-megla GmbH. The company is located in Eitorf in the greater area of Cologne, Germany.

Innovation is the basis of our success. Easy installation, quality products and creative design is our credo. The success of our customers confirms our philosophy.

the perfect showerdoor

highest quality • complete adjustability • unique design
